

REMARKS

The foregoing amendments are made in order to bring the specification and claims of the application into conformance with standard U.S. patent practice, and to avoid multiple dependent claims. It is believed that no additional fees are necessary. However, in the event any fees are due, kindly charge the cost thereof to our Deposit Account No. 13-2855.

Attorney for Applicant

ABSTRACT

Device for driving animals in an oblong corridor section using a driving gate which can be moved from one end to the other of the corridor section. A first transport arrangement moves the driving gate in the corridor section in a longitudinal direction of the section; and moves the gate in the opposite direction after it has been brought outside the corridor section. A second transport arrangement pulls the gate sideways out from the corridor section in the plane of the gate through a gap in one side wall of the corridor section.
